

nourhan mohamed  
back-end developer

I'm Nourhan Mohamed Salah, a  
passionate Back-End Developer  
skilled in Node.js, Express, and SQL  
databases. I enjoy solving problems  
and building efficient, scalable  
applications.

*about me*

# my education

## Education

Computer Science Student  
Faculty of Computers and Information

## Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript,  
Angular

Backend: Node.js

Database: MongoDB

# personal skills

## HIGH- INCOME Skills YOU CAN TEACH YOURSELF

technical

- 1-HTML, CSS, JavaScript, TypeScript
- 2-Angular, Node.js
- 3-MongoDB
- 4-Git & GitHub
- 5-Word & excel

soft skills

- 1-Problem Solving
- 2-Fast Learner
- 3-Quick Thinking
- 4-Communication Skills
- 5-Teamwork & Collaboration
- 6-Time Management

# work experience

MEAN Stack Training Gained hands-on experience in MongoDB, Express, Angular, and Node.js.

CCNA Training Learned computer networks, routing & switching basics.

CCNB Training Covered advanced networking concepts and practical applications.

# Our Services

## designing and managing database

I design databases that keep your data safe, organized, and easy to access.

My goal is to make data management smooth, reliable, and stress-free.

## Developing and integrating APIs

I create APIs that connect everything together, making apps work smoothly. They're built to be fast, reliable, and super easy to use.

## Implementing server-side logic and security

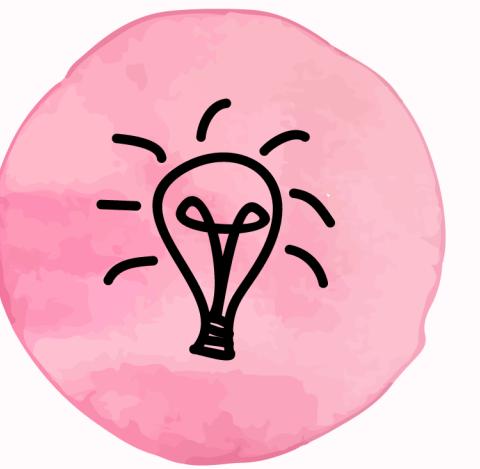

I handle the behind-the-scenes logic that brings your app to life. Security is always a priority — keeping both you and your users safe.

# offerd services

Free bug fixing  
for 2 weeks  
after delivery.

Minor revisions  
included after  
project  
completion.

Help with  
project  
deployment and  
setup.

# Project

Project: Task Management System

Description: A web application that allows users to create, update, and track daily tasks with deadlines and priorities. Role: Backend developer

(designed the database and built REST APIs). Technologies: Node.js, Express.js,

MongoDB, Angular. Outcome:

Successfully completed as a training project, tested by students and delivered with full CRUD operations.

## Task Management System

### Tasks

Add Task

Task Title	Deadline	Priority	Status
Design landing page	2024-05-01	High	Overdue
Develop authentication	2024-04-20	Medium	Pending
Test the API	2024-04-18	Low	Completed
Deploy to production	2024-04-25	High	Completed

# testimonials

"Great service and very professional!"

"Delivered on time with excellent quality."

"Highly recommended, very creative work."

"Amazing experience, I will work with her again."
